

Testimonials

"Mary and her staff have tutored our children not only in specific subject matter but also in test taking skills and confidence building. We appreciate their professionalism and well rounded approach!!!" ~ Leigh

"My daughter didn't want to read, and homework was a struggle. An initial assessment revealed problems with reading comprehension. We started with APA and they showed her that reading and learning doesn't have to be a struggle and it can be fun. She now loves to do her homework! We are definitely seeing an improvement and she looks forward to her weekly tutoring session." ~ Jennifer
